# ISM3232C
## Module 6 Project: Arrays (Part 2)

**Instructions**

Continue Lab 6, beginning with the section titled 'High-level design'. Complete all coding through the section titled 'Initializing our application'. Be sure your code compiles cleanly. Run the application and get screen snips of the interface when a chart is loaded.

There is no Canvas submission for this project, you will submit your work to a GitHub repository as described below.

**Submitting your work**

Once your project is complete, commit your files (source code and multiple screen snips saved to a PowerPoint file) to the provided classroom repository. Your instructor will clone and grade your repo after the due date for this assignment.

There is no Canvas submission for this project.
